Paragon Pools Executives named Masters of Design 2021 by Pool and Spa News

(Las Vegas, NV) September 15, 2021 – Paragon Pools Executives, Joseph Michael Vassallo, President and Joseph Anthony Vassallo, Vice-President were named Masters of Design 2021 by Pool and Spa News for their custom spa project, “Once in a Blue Moon.”

The award-winning design by the Las Vegas pool builders, features a 360-degree, elevated, perimeter-overflow spa, enlarged wet deck, plunge pool and accent wall with fire and water features.

“It is Once in a Blue Moon, that we are presented with a project this unique. It was truly an exceptional experience, for us to call upon our talents and creativity given the small space and multiple features the homeowner wanted to include. Our initial thoughts were how to accomplish this and still aesthetically keep the project in balance and proportion,” notes Joseph Anthony. “By incorporating a variety of architectural and design elements we were able to create this masterful, award-worthy aquatic structure.”

Pool and Spa News, one of the aquatic industry’s top magazines hosts the annual competition honoring the best in pool and spa design, publishing a special issue to highlight the winners. According to the publication... *Every year, we devote an issue to some of the most beautiful pools and spas being realized and, in so doing, celebrating the reason we’re here — to provide the beauty and other quality-of-life benefits that pools and spas offer. This year is no different. As always, this year’s gallery includes pools and spas of every format. Enjoy these gems.* The 2021 competition received a vast number of projects for consideration, but only 9 received the coveted award. [2021 Pool and Spa News Masters of Design](#)

“The combination of features in such a small footprint shows a creative solution to the small-backyard trend,” remarked one of the competition judges.

The design-build pool company celebrating its 20th anniversary has won three Masters of Design awards, all for custom spas. Featured products included in the design are Fluidra/Jandy/Zodiac pool equipment: pumps, heater, filter, lights remote control & sheer descent, Paramount Pool Systems: PV3 in-floor cleaner and Clear O3 Ozone & UV sanitation system, Pebble Technologies: PebbleBrilliance Aqua Falls and Mastertile: AQ1156.

Images submitted of the project were taken by the company’s exclusive photographer Mary Vail, MBA Publicist.
